UNIVERSITY OF VICTORIA
LONDON - UK

UOVL

WWW.UOVL.UK

WHO WE ARE:

University of Victoria in London is one of the UK's prestigious institutions of higher education and is distinguished by its combination of flexibility and high-quality education. The university provides great opportunities for students around the world through distance learning according to modern methods and leadership of innovation and modern research. The university works hard to strengthen the relationship with its students, motivate and guide them to ensure their success and acquire the skills that qualify them to work in their various study specializations.

The university is officially registered and accredited by the Accredited by UK Register of Learning Providers (UKRLP) under No. 10088618 as an academic institution working in the field of undergraduate, postgraduate studies and training.

Our Vision:

University of Victoria London (UOVL) believes that access to higher education is a key ingredient in the promotion of world peace and global economic development. It views higher education as a basic right and believes that it can both transform the lives of individuals and be an important force for societal change. UOVL believes that education plays a fundamental role in strengthening respect for human rights and fundamental freedoms, and in promoting understanding and tolerance.

Our Mission:

The mission of University of Victoria is to offer affordable, quality, online, degree-granting educational programs to any qualified student.

Our Goals:

To provide the opportunity for higher education to students from diverse backgrounds through:
Utilising the internet to provide distance education
Offering programs at minimal costs
Providing a wide range of financial assistance options

UOVL is based on the belief that education at a minimal cost is a basic right for all qualified applicants, not just for a privileged few. The University works to open the gates of higher education to qualified students anywhere in the world by offering its programs through distance learning and by making this opportunity affordable.

Quality:

UOVL provides a high-quality, online liberal arts education suitable in scope and depth to the challenges of the 21st century. The University assesses and evaluates all aspects of its academic model on an ongoing basis.

Introduction:

The DEPARTMENT OF TECHNOLOGY & IT - SOFTWARE is seeking to apply a new strategy in the field of multiple engineering disciplines to prepare the necessary staff to meet the needs of the labour market, in light of modern data and providing high-quality output.

Vision:

The department seeks to achieve excellence in engineering fields at the local, regional and global levels, under an intellectual and Professional span, to contribute to the Community service and achieving scientific development and to contribute to the preparation of engineering staff in the field of specialisation in accordance with the scientific and economic developments in the World.

Mission:

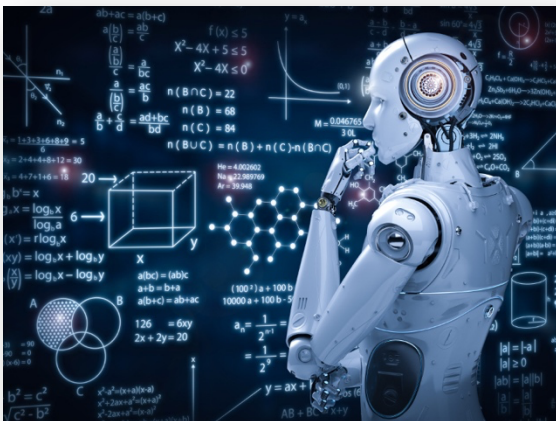

To provide high quality academic programs in line with the scientific and technological development at the local, regional and international levels and to participate actively in the development of techniques and continuous improvement in the educational and research system in the college through continuous cooperation with the bodies working in different engineering disciplines.

Objectives:

1. Advancement of scientific research.
2. Graduation of qualified and creative pioneer engineers.
3. Community service through continuous education and engineering consultancy.

Engineering Management Courses:

- Designing Lean Systems.
- Facilities Location.
- Forecasting Demand.
- Planning and Scheduling Operations.
- Supply Chain Management.
- Designing Lean systems.
- Quality Management.
- Statistical Process Control (SPC).
- Six Sigma.
- Quality of Services.
- Maintenance Planning and Management.
- Root Cause Analysis (RCA).
- Inventory Management and Planning.
- Cost Accounting for Engineers.
- Strategic Skills and Management.

DEPARTMENT OF LANGUAGES

Introduction:

Home Earth Continents Countries of the World International Languages

What language is spoken in...

What is the Official Language of ...

Need to know which language is spoken in which country?

Find the answer in the pages below.

Languages of the World

Language is the specifically human capacity for acquiring and using complex systems of acoustic as well as kinesic signals to express thoughts and feelings, and language is used for the exchange of knowledge and experiences.

The problem on this planet is the language systems vary greatly from region to region. The variety may be so different that one individual does not understand the language of a member from another region or country.

Introduction:

Course Details:

The Health Sciences Diploma - Bachelor's - Postgraduate Studies (Masters - PhD) offers students an in-depth study of the holistic nature of health and disease and a detailed coverage of the integrated health disciplines.

These include: health psychology, health sociology, medical anthropology, human biology and physiology, human nutrition, public health, Sports Medicine, Chiropractic, Physical Therapy, Rehabilitation, Osteopathy, Massage, health promotion, health policy and biomedical ethics. The programme takes as its point of departure the WHO definition of health which states that 'health is a state of complete physical, mental and social well-being and not merely the absence of disease' (WHO 1947).

As students progress from level 4 to level 6, they will learn critical evaluation and appraisal, research and communication skills, and how to construct and defend an academic argument.

Introduction:

Overview:

Pushing boundaries. Breaking records. Training in extreme environments. On this BSc (Hons) Sport and Exercise Science degree, you'll examine performance, explore athletes' limits, and understand how physical exercise benefits health.

This course is endorsed by the British Association of Sport and Exercise Science (BASES). You'll study a combination of theory, research and laboratory techniques so you can understand and apply the scientific principles that help humans perform at their best.

But it's not just about elite athletes. You'll help develop tools everyone can use to improve their lives. You'll become a passionate advocate for the important role sport science plays in today's society.

You can gain qualifications in first aid and national coaching, so you can step into careers in industry, professional sport, health and education.

What jobs can you do with a Sport and Exercise Science degree?

Roles our graduates have taken on include:

- PE teacher
- fitness instructor
- NVQ coordinator
- sports development officer
- sports and exercise scientist
- sports therapist and physiotherapist
- cardiac rehabilitation technician

DEPARTMENT OF BUSINESS ADMINISTRATION & MARKETING

Introduction:

AminisP

Vision:

The DEPARTMENT OF BUSINESS ADMINISTRATION & MARKETING in its various departments of economics, Administration, statistics, accounting, business administration, large and small enterprises and other modern scientific disciplines should be available to all Arab students in the Arab world and abroad. The student can use (Arabic, English) languages to learn, write dissertations and thesis to obtain prestigious degrees.

Mission:

The DEPARTMENT OF BUSINESS ADMINISTRATION & MARKETING, with its various branches and scientific departments, should have a platform for science and knowledge in its important human disciplines and in keeping pace with contemporary scientific developments, encouraging students to write solid scientific research, and working to create values and principles for the Arab generations to hold the Brigade of knowledge and development.

Objectives:

1. Opening the domain and opportunities for science and knowledge to reach all those who want to learn.
2. Development of economic, administrative, professional and financial educational and research systems.
3. Work to create a promising scientific and educational environment using modern and outstanding educational programs.
4. Opening the way for Arab students to communicate through modern means of communication, creating opportunities for diversifying sources of finance and development, creating a developed future and sustainable development in the Arab society.
5. Development of administrative systems and processes in line with scientific, cognitive and technical development and building bridges of communication with faculties in scientific and sober universities at the global level.

Introduction:

What is the media?

Media are the communication outlets or tools used to store and deliver information or data. The term refers to components of the mass media communications industry, such as print media, publishing, the news media, photography, cinema, broadcasting (radio and television), digital media, and advertising.

The development of early writing and paper enabling longer-distance communication systems such as mail, including in the Persian Empire (Chapar Khaneh and Angarium) and Roman Empire, which can be interpreted as early forms of media.[4] Writers such as Howard Rheingold have framed early forms of human communication as early forms of media, such as the Lascaux cave paintings and early writing.[5] Another framing of the history of media starts with the Chauvet Cave paintings and continues with other ways to carry human communication beyond the short range of voice: smoke signals, trail markers, and sculpture.

The Term media in its modern application relating to communication channels was first used by Canadian communications theorist Marshall McLuhan, who stated in Counterblast (1954): "The media are not toys; they should not be in the hands of Mother Goose and Peter Pan executives. They can be entrusted only to new artists because they are art forms." By the mid-1960s, the term had spread to general use in North America and the United Kingdom. The phrase "mass media" was, according to H.L. Mencken, used as early as 1923 in the United States.

The term "medium" (the singular form of "media") is defined as "one of the means or channels of general communication, information, or entertainment in society, as newspapers, radio, or television.

Introduction:

Training and development describes the formal, ongoing efforts that are made within organisations to improve the performance and self-fulfillment of their employees through a variety of educational methods and programs. In the modern workplace, these efforts have taken on a broad range of applications—from instruction in highly specific job skills to long-term professional development. In recent years, training and development has emerged as a formal business function, an integral element of strategy, and a recognised profession with distinct theories and methodologies. More and more companies of all sizes have embraced "continual learning" and other aspects of training and development as a means of promoting employee growth and acquiring a highly skilled work force. In fact, the quality of employees and the continual improvement of their skills and productivity through training, are now widely recognised as vital factors in ensuring the long-term success and profitability of small businesses.

For the most part, the terms "training" and "development" are used together to describe the overall improvement and education of an organisation's employees. However, while closely related, there are important differences between the terms that center around the scope of the application. In general, training programs have very specific and quantifiable goals, like operating a particular piece of machinery, understanding a specific process, or performing certain procedures with great precision. Developmental programs, on the other hand, concentrate on broader skills that are applicable to a wider variety of situations, such as decision making, leadership skills, and goal setting.
